Population Estimates 1940 to 1965

	Hawaiians	Part-Hawaiians	Japanese	Chinese	Filipinos	Whites (w/ Portuguese)	
1940	14,000	50,000	160,000	28,000	53,000	100,000	Asian Mixes
							Whites (w/ Port)
1950	12,000	73,000	185,000	32,000	61,000	20,000	115,000
							Whites (w/ Port + Puerto Ricans)
1960	11,000	91,000	203,000	38,000	69,000	200,000	Asian Mixes
1965	7,500	118,000	n/a	n/a	n/a	50,000	

Source: Robert C. Schmitt, *Historical Statistics of Hawaii*

Note: From 1940 forward, Portuguese were included in the white population. From 1960 forward, Puerto Ricans were included in the white population. Some 1965 group statistics are not available.

Population Estimates at end of 20th century

Hawaiians	Part-Hawaiians	Japanese	Chinese	Filipinos	Asian Mixes	Whites (w/ Port and PR)
5,000	231,000	208,000	42,000	145,000	185,000	251,000

Source: 1998 Hawaii State Department of Health special tabulation, and 2002 CDC article.

Hawaiians	Part-Hawaiians	Japanese	Chinese	Filipinos	Asian Mixes	Whites (w/ Port and PR)
5,000	234,000	201,000	56,000	170,000	199,000	294,000

Source: 2000 Federal Census, and 2002 CDC article.

Note: Some 2000 Federal Census data may be inflated because individuals could claim more than one race. The addition of other groups not included in the above charts creates a total population of about 1.2 million. However, differing "unmixed" Japanese estimates show that population statistics are not an exact science.
